EDUCATION

University of Kentucky | B.S. Computer Engineering | AI Certificate (In Progress)

Aug 2025 – May 2028

GPA: **3.9** | **Dean's List** | Tau Beta Pi Engineering Honor Society (Top 8% of engineering class)

Relevant Coursework: Systems Programming, Logic Circuit Design, Embedded Systems, Engineering Practice

WORK EXPERIENCE

Pomme Rouge SARL

Douala, Cameroon

Web & Operations Intern

Dec 2024 – May 2025

- Built and modified HTML/CSS pages for company web applications.
- Developed Excel-based systems to manage fleet operations and expenses.
- Coordinated with external software developers during website implementation.
- Installed and maintained software and hardware for employees.
- Provided technical troubleshooting and IT support.

PROJECTS

AI-Powered Study Assistant | [JavaScript](#) · [OpenAI API](#) · [REST APIs](#) · [HTML/CSS](#) | [Live Demo](#) | [GitHub](#)

- Built an AI-powered assistant that provides personalized academic support and question answering.
- Integrated large language models through APIs to generate contextual responses.
- Designed prompt engineering workflows to improve accuracy and usability.
- Collaborated with teammates during a hackathon environment to deliver a working prototype.

Social Book – Full-Stack Social Media Platform | [Django](#) · [Python](#) · [SQLite](#) · [HTML/CSS](#) · [AWS Elastic Beanstalk](#) | [Live Demo](#) | [GitHub](#)

- Built a full-stack social media web application that allows users to create accounts, upload posts, search for users, follow/unfollow profiles, and interact through likes.
- Implemented user authentication, profile management, image uploads, follower relationships, and dynamic content feeds using Django's MVC architecture.
- Designed and integrated relational database models for users, posts, profiles, likes, and follower tracking using SQLite and Django ORM.
- Deployed the application to AWS Elastic Beanstalk and configured static file handling, media storage, and production-ready Django settings.

Student Performance Analyzer | [Python](#) · [Pandas](#) · [NumPy](#) · [Matplotlib](#) | [GitHub](#)

- Ingested and cleaned a 1,000-record student dataset; computed per-subject descriptive statistics (mean, median, standard deviation) and Pearson correlation matrices across three academic subjects.
- Built a vectorized grade-classification pipeline converting continuous scores to letter grades, then rendered a color-coded pie chart for grade distribution analysis.
- Surfaced a strong Reading-Writing correlation ($r \approx 0.95$), demonstrating end-to-end analytical workflow from raw data to actionable insight.

Personal Portfolio Website | [HTML](#) · [CSS](#) · [JavaScript](#) | [Link](#)

- Designed and deployed a responsive portfolio website showcasing software projects and technical experience.
- Implemented interactive components and optimized performance for different screen sizes.
- Maintained source control using Git and GitHub.

Pixel Runner Game | [Python](#) · [Pygame](#) | [Live Demo](#) | [GitHub](#)

- Developed a real-time event-driven game architecture with collision detection and physics mechanics.
- Implemented object-oriented programming principles and frame-based scheduling.
- Created reusable components and tested gameplay functionality.

Hydroponic Monitoring System | [C++](#) · [Arduino](#) · [MATLAB](#) · [Onshape](#) · [Sensors](#) | [Project Site](#)

- Calibrated pH and water-level sensor arrays across full operating ranges; iterative bench testing reduced measurement error.
- Wrote embedded C++ control logic to automate water regulation in real time based on live sensor readings, replacing manual adjustment cycles.

TECHNICAL SKILLS

Languages: Python, JavaScript, C/C++, HTML, CSS

Frameworks & Libraries: React, Django, Pygame, PyQt5, NumPy, Pandas, Matplotlib

APIs & Protocols: OpenAI API, REST APIs, UART, GPIO

Tools: Git/GitHub, VS Code, PyCharm, MATLAB, Arduino IDE

AI / Machine Learning: OpenAI GPT APIs, Prompt Engineering, LLM Applications

Databases: SQL, PostgreSQL, MongoDB

Other: Fluent in English and French

LEADERSHIP & HONORS

Student Ambassador — University of Kentucky

Aug 2025 – Present

Represent UK in Cameroon; advise prospective students on engineering admissions, scholarship opportunities, and academic programs.

Tau Beta Pi Engineering Honor Society — Member (2026) | Selected for academic excellence — top 8% of UK engineering class.
